Cheat sheet for variable names:

Shapefiles (.shp) have a 10 character limit for field names. Here are the names I came up with when I merged the OCHPP data on COPD with the shapefile they provided us. These are totally subject to change as we see fit.

- Vince

NEIGH_ID – Alpha-numerical neighbourhood ID

COPD_M35 – Number of men with COPD over 35 (per neighbourhood)

COPD_F35 - Number of women with COPD over 35 (per neighbourhood)

COPD_T35 – Population with COPD over 35

MPOP_35 – Total male population over 35

FPOP_35 – Total female population over 35

TPOP_35 – Total population over 35

COPDM35_64 -Number of men with COPD between 35-64

COPDF35_64 - Number of women with COPD between 35-64

COPDT35_64 –Population with COPD between 35-64

MPOP35_64 – Total male population between 35-64

FPOP35_64 – Total female population between 35-64

TPOP35_64 – Total population between 35-64

COPD_M65 – Number of men with COPD over 65

COPD_F65 – Number of women with COPD over 65

COPD_T35 – Population with COPD over 65

MPOP_65 – Total male population over 65

FPOP_65 – Total female population over 65

TPOP_65 – Total population over 65
